

CAPABILITIES STATEMENT

ABOUT ARCAS MACHINE, INC

We are quality obsessed and know how important this is to you, too. We've manufactured precision build-to-print parts for nearly 60 years for this reason and we are determined to ensure that everything you experience with Arcas Machine is second-to-none. We work towards your organization's goals and KPIs, while supporting our buyers and ensuring they have the best information possible on any parts ordered through us. Our major customers (including Honeywell, Moog, and Sargent) have grown with us for as long as 40 years as we've invested in emerging technologies like 5-axis machines, CMMs, and, soon, 3D printing/additive manufacturing.

CORE COMPETENCIES

TURNING

MILLING

**MULTIPLE
OPERATION**

Size Envelope: 8"

Tolerance: 0.0002"

Quantities: 1 - 10,000
